Bronston Integrated Care

Whether you're dealing with nagging pain or a new injury, you want caring, professional help to discover the source of your pain, restore your body, and get you back in motion.

We start by discussing your current situation, needs, and pain-relief goals, then work with you to determine the best personal care plan.

Next, Bronston chiropractors, physical therapists, and massage therapists help resolve your pain safely, effectively, and affordably. We use natural techniques, not opioids, and teach you strategies for improving your health and preventing future injuries – so you can get back to work and the activities you love.

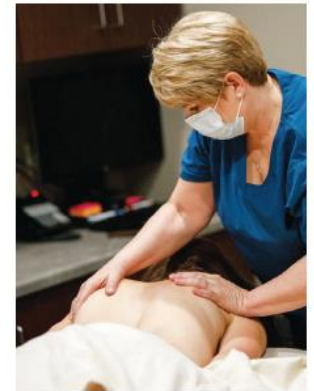

Services & Techniques

Your Bronston care providers are trained and skilled in traditional and cutting-edge modalities, including:

- Chiropractic Adjustments
- Physical Therapy
- Massage Therapy
- Ultrasound Therapy
- Electrical Muscle Stimulation
- Dry Needling
- Soft Tissue Techniques
- Diagnostic X-ray and Ultrasound
- Aquatic Therapy
- Sports Medicine
- Exercise Rehabilitation
- Orthotics
- Nutritional Counseling

We also offer DOT exams and drug screening with fast results.

Patient-Centered Approach

As our patient, you come first at Bronston Chiropractic Clinics. Count on us to go the extra mile, putting your health at the center of the care experience.

Bronston is a proud recipient of the ChiroCare Center of Excellence award from Fulcrum Health, Inc. This designation confirms that we follow well-defined procedures, so you receive consistent care with optimal outcomes.

Our team is headed by Dr. Leo Bronston, a leader in healthcare with experience serving on the American Chiropractic Association (Board of Governors) and the American Medical Association (CPT editorial panel). Trust the Bronston team to provide the best patient experience for you and your family.

Collaborative Health Care

While serving chiropractic patients, we noted the need for affordable, accessible, quality medical care. In response, we developed our model of collaborative, integrated care into a family practice called the Community Care Clinic, a division of Bronston Chiropractic.

With today's rising healthcare costs and high deductibles, rely on the Community Care Clinic for diagnosis and treatment of common medical conditions by qualified health professionals, plus X-rays, lab tests, and prescriptions.

Fees are very affordable, with same-day appointments often available. Referrals to area providers, as needed, ensure seamless healthcare networking. See CommunityCareClinicLaCrosse.com.

Employer Services

Bronston Clinics offers special contracting with many area businesses, including education and government groups. Your employer may participate in a contract with our clinics, offering you free, no-deductible, no co-pay coverage. Please check with your employer regarding benefits.
